Summary (Subject and/or Methodology for generation)	We digitized the data from the 1990 World Agriculture and Forestry Census. Additionally, we downloaded the data from 2000, 2005, 2010, and 2015, and constructed panel data at the village level. Although the definition of "village" changes midway, we provide a readme file to address this. The scripts for these tasks also are made public.
Update History (Versions, File names, Dates)	First Edition, File Name: ## (##: Prefecture Code), 2024/05/22
Data formats	Data: CSV format, Excel format Scripts: Python code
Data sizes	Excel format (total 27.3MB), CSV format (total 13.7MB)
Things to be aware of when using the data (e.g., required metadata)	For more details about each attribute of the data, please refer to Readme.docx. If there are any errors in the data, we would appreciate it if you could let us know. Please read the usage rules of the Social Engineering Commons Data Bank.
