

Data Description

2024 年度プロジェクト : DB2022-04

Data Number (will be filled by the Commons Center)	DPPSCdbp_2022-04en
Title	Database of thin ideal image in Japan
Creator	Hikari Namatame
Contact information	namatame.hikari.gf@u.tsukuba.ac.jp
Summary (Subject and/or Methodology for generation)	The experience sampling method survey was conducted three times a day over a three-day period, targeting women aged 18 to 30. The survey included questions about the use of social networking services, whether they had seen images of women emphasizing their thinness, guilt about eating, body image scales, etc. For details, please refer to the label list sheet of the data file.
